Fairview STEM Magnet School News

Project Highlight
Tracking the Four Seasons

Kindergarten students started to explore the world around them. Over the school year, students will be investigating the four seasons. They will be documenting their learning through photos and video!

In October, students explored Tollgate and made observations using their senses.

A picture is worth a thousand words. In this photo, on student discovered a walnut comes from this green husk!

Students were able to notice the following:

- Changing of the leaves
- Ducks and Cranes
- Caterpillars
- Seed pods
- Smell of decaying leaves
- Cool temperatures

Mrs. Black's Classroom

Mrs. Schobert's Classroom

In this photo students are getting to see and touch a Woolly Bear Caterpillar.

Students had an exciting experience and are looking forward to going again to continue their project!

Funding Factory
Help Our School Raise Money

How many of you have old cameras, cell phones, ink cartridges, MP3 players, headsets, computers, or GPS units?

Funding Factory is a new and easy way to help our school earn money. We have a box by the office that you can

drop these items off. They do not even need to be in working order!

Each item donated will be recycled. Through this program our school receives money. The money that we fundraise will directly help all of our Fairview STEM students!!!

Upcoming School Events!!

Election Day No School	4th
