

Mt. Hope

STEAM

Students at Mt. Hope STEAM Magnet School experience an engaging, project-based learning environment that gives them the opportunity to show what they know and apply what they are learning. Students think critically, work in teams, and showcase their knowledge through multi-media presentations.

Grades: 4-6

WHAT IS STEAM?

STEAM is an educational approach to learning that uses science, technology, engineering, the arts and mathematics as access.

What Makes Mt. Hope Special?

- Project-based learning and engineering design takes place in State-of-the-art technology in STEAM Learning Labs.
- Computer-Aided Design (CAD), coding, and digital imaging connect learning to real experiences.
- Discovery Education's Techbook and STEM connect provide options that fully integrate video, text, audio and writing in a 24/7 learning environment that deepens student understanding of STEM principles.
- After-school programming: tutoring, field trips, robotics, athletic options, vocal music, gardening and more.
