

### Procedure to Communicate Content Standards

Curriculum steering committees ensure curriculum pacing guides are aligned with core content standards. Once alignment is assured and pacing guides are complete they are shared by executive leadership with staff during Instructional Council meetings, principals at principal meetings, and posted on the Deputy Superintendent's Curriculum Corner page (<http://www.lansingschools.net/departments/deputy-superintendent/curriculum-corner/>) as well as the Deputy Superintendent's curriculum page (<http://www.lansingschools.net/departments/deputy-superintendent/curriculum/pacing-guidelines/>). Curriculum and content standards are also communicated District-wide through targeted professional learning opportunities at both the District-level and school-level. Walk-through, observation, and evaluation tools are used to check for implementation of the curriculum aligned with core content standards.
