

Table One – Facilities and School Structures
Overview of Data - LSD Strategic Planning Community and Staff Input

Table One represents a review of responses collected during Community Input Sessions where participants responded to key questions about their impressions of the school district. The responses allowed the Michigan State University (MSU) planning team to identify broad categories to which the input could be assigned. The table’s purpose is to, 1) Name the categories and use them as tools to organize the responses, 2) provide participant responses to **TWO** key questions, and 3) summarize those responses as data the sub-committees will use to facilitate planning. **Information in this table will assist sub-committees in making decisions about Strategic planning goals, objectives and success indicators.**

The two questions posed at community input sessions are, “What are your hopes for the district?” and “What do you think we need to change about the district?” The color of text identifies the community venue where the comment was made. Please see the color key in each table.

Diversity, Equity and Inclusion

Equity as the Priority and Diversity an Asset

Overview of Data - LSD Strategic Planning Community and Staff Input

This section’s reference to Diversity Equity and Inclusion is not envisioned as the instrument of any one Sub-committee. Rather, it is intended as a tool to assist each of the five sub-committees in ensuring that goals, objectives and success indicators created during the strategic planning process meet the standards set by the Lansing School District’s Systemic Equity Review. It is, as well, a reminder that Diversity, Equity and Inclusion are core values and requirements of every facet of district planning and execution. As such, it is incumbent upon each of the sub-committees to, “. . .explore [and adhere to] the central elements of culturally responsive and sustaining education.” (Systemic Equity Review of Lansing Public Schools, p. 8)
