

Students at Averill New Tech Elementary will follow a project based learning model infusing technology into the curriculum with an emphasis on Science.

Our New Tech program provides a culture that empowers students and teachers through a hands on approach ensuring student academic, social and emotional maturity.

Grades: PreK-3

## What is **New Tech Network**?

Project based learning provides relevant experiences that students will find engaging and impactful. This model strengthens the classroom environment for students through an emphasis on real world experiences, researching and investigating problems, and establishing communities of critical and ethical thinkers. Students will learn while doing, which will enhance their cognition through a supportive and collaborative culture

Averill's technological environment fosters the culture of our 3 C's (Communication, Collaboration & Creativity) through New Tech's online learning platform entitled ECHO. The ECHO system supports the work of our project based learning activities, and serves as the communication link between staff, students and parents through progress monitoring.

## What makes **Averill** special?

- ECSE and GSRP classrooms so families can join the Averill family earlier than Kindergarten
- One to one ipad and laptop accessibility
- Project Based Learning Science Lab
- Member of the New Tech Network
- Garden Club
- Read to Succeed
