

# NORTH SCHOOL

Food, Energy, and Environment

Students at North School are immersed in a hands-on, project based learning environment, which gives them the opportunity to gain skill and knowledge in the areas of Environment, Energy and Food sciences.

Our students are constantly challenged to inquire and explore through projects that encourage and inspire true innovation for today's changing world.

Grades: 4-6

## WELCOME TO OUR SCHOOL

North School is taking an educational approach to learning that uses the science behind food, energy and the environment as access points for guiding student inquiry, dialogue, and critical thinking.
